

# Prison: the facts

Bromley Briefings Summer 2018

Facts and figures provide a better basis than opinion for policy and practice change. Drawn largely from government sources, these facts chart the extraordinary rise in prison numbers over the last twenty years, inflation in sentencing and the social and economic consequences of overuse of custody. They reveal the state of our overcrowded prisons and the state of people in them, the impact of deep budget cuts, the pace and scale of change in the justice system and the scope for community solutions to crime.

## Sentencing and the use of custody

England and Wales has the highest imprisonment rate in western Europe

Prison population rate  
(per 100,000 population)

Source: International Centre for Prison Studies

The prison population has risen by 77% in the last 30 years

Source: Offender management statistics, Prison Population 2017 and Population and capacity briefing for 20 July 2018

Yet there is no link between the prison population and levels of crime according to the National Audit Office.<sup>1</sup> International comparisons also show there is no consistent link between the two.<sup>2</sup>

In England and Wales, we overuse prison for petty and persistent crime.<sup>3</sup>

Nearly

**65,000**

people were sent to prison to serve a sentence in 2017

The majority had committed a non-violent offence

Almost half were sentenced to serve six months or less

Short prison sentences are less effective than community sentences at reducing reoffending.<sup>4</sup>

Yet, the use of community sentences has more than halved in only a decade.

Suspended sentences have risen, but account for only 4% of all sentences.<sup>5</sup>

<sup>5</sup> Table Q5.1b and Q5.4, Ministry of Justice (2017) Criminal justice statistics quarterly June 2017, London: Ministry of Justice

**Community sentences** are particularly effective for people who have committed a large number of previous offences (more than 50) and those with mental health problems, according to research by the Ministry of Justice.<sup>6</sup>

## We choose to send people to prison for a long time...and it's growing.

More than three times as many people were sentenced to 10 years or more in 2017 than a decade ago.<sup>7</sup>

Source: Criminal justice statistics quarterly December 2017

For more serious, indictable offences, the average prison sentence is now 57.1 months—25 and a half months longer than 10 years ago.<sup>8</sup>

Source: Criminal justice statistics quarterly December 2017

People serving mandatory life sentences are spending more of their sentence in prison. On average they spend 17 years in custody, up from 13 years in 2001.<sup>9</sup>

Judges are also imposing longer tariff periods.<sup>10</sup> The average minimum term imposed for murder rose from 12.5 years in 2003 to 21.3 years in 2016.<sup>11</sup>

Many of our prisons are overcrowded—and have been for a long time. Overcrowding affects whether activities, staff and other resources are available to reduce risk of reoffending, as well as distance from families and other support networks.<sup>12</sup>

In 2016–17 nearly 21,000 people were held in overcrowded accommodation—almost a quarter of the prison population. This level of overcrowding has remained broadly unchanged for the last 14 years.<sup>13</sup>

## Many are released from prison, only to return there shortly after.

Anyone leaving custody who has served two days or more is now required to serve a minimum of 12 months under supervision in the community.<sup>14</sup>

**As a result, the number of people recalled back to custody has increased, particularly amongst women. 8,825 people serving a sentence of less than 12 months were recalled to prison in the year to December 2017.<sup>15</sup>**

## Safety in prisons

**Safety in prisons has deteriorated rapidly during the last six years.** People in prison, prisoners and staff, are less safe than they have been at any other point since records began, with more self-harm and assaults than ever before. Despite a welcome decline, the number of self-inflicted deaths remains high.

# 299

People died in prison in the year to March 2018

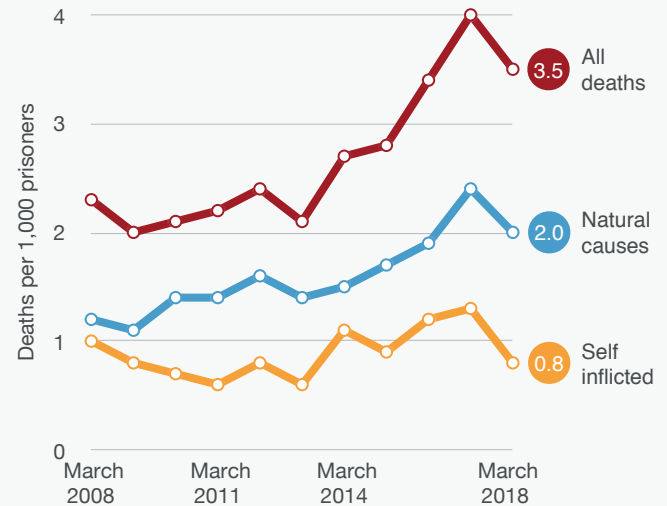

Nearly a quarter were self-inflicted

68 were men  
1 was a woman

Rates of death in prison have risen sharply in the last six years—but have begun to fall at last.

Self-inflicted deaths are 5.1 times more likely in prison than in the general population.<sup>14</sup>

### Self-harm

Rates of self-harm are at the highest level ever recorded

**Women** account for a disproportionate number of self-harm incidents in prison—despite making up only 5% of the total prison population.

But in recent years there has been a significant rise in self-harm incidents by **men**.

Proportion of all self-harm incidents (12 months ending December 2017)

Source: Safety in custody statistics quarterly update to December 2017

### Assaults

Serious assaults are at the highest level ever recorded

Assaults on staff have

# ↑ 158%

in only four years

assaults on staff in the year to December 2017

864

were classified as serious

**There were five homicides in prison in the year to March 2018 and another three the year before.**<sup>16</sup>

**Sexual assaults in prison have more than tripled since 2012.** There were 395 recorded assaults in 2017.<sup>17</sup>

**There were 79 deaths in prison between June 2013 and September 2016, where the person was known, or strongly suspected, to have used or possessed new psychoactive substances (NPS) before their death—56 of these were self-inflicted.**<sup>18</sup>

### Prison service resources and staffing

**HM Prisons and Probation Service (HMPPS) reduced its budget by nearly a quarter between 2010–11 and 2014–15.**<sup>19</sup>

**Spending has begun to increase.** Total expenditure in 2016–17 was £3,723m—£206m more than the year before.<sup>20</sup>

**But the Ministry of Justice faces significant financial pressures.** Its budget fell by £400m in 2018–19 and will decrease by a further £200m in 2019–20.<sup>21</sup>

**£1.3bn has been announced to invest in reforming and modernising the prison estate.** The government has committed to build nine new prisons, five of these by 2020. To date building work has not started on any of the announced sites.<sup>22</sup>

**However, analysis conducted for the Prison Reform Trust estimates that these plans face a shortfall of £162m in 2018–19, rising to £463m in 2022–23 as a result of prison population pressures.**<sup>23</sup>

**A new 2,106 place prison in Wrexham, North Wales opened in February 2017 at a cost of £212m.**<sup>24</sup> Plans were also announced to create 5,000 further places with the possible building of four new prisons in Yorkshire, Wigan, Rochester and Port Talbot.<sup>25</sup>

**However, the prison population is expected to grow by around 1,600 above previous predictions by 2022.**<sup>26</sup> Plans to close HMPs Rochester and Hindley have been delayed due to pressure for prison places, and the Welsh Government has refused to give consent to build a prison at Port Talbot.<sup>27</sup>

**The cost of a prison place has reduced by nearly a quarter (23%) between 2009–10 and 2016–17.** The average annual overall cost of a prison place in England and Wales is now £38,042.<sup>28</sup>

**The government is attempting to boost officer numbers following a 25% cut in frontline operational staff between 2010–2017.**<sup>29</sup> The reduction in staff numbers “has been detrimental to security, stability and good order in prisons” according to Ministry of Justice Permanent Secretary, Richard Heaton.<sup>30</sup>

**£100m has been committed to recruit a further 2,500 officers by December 2018.**<sup>31</sup> This target has now been met, with the number of prison officers increasing by 2,638 in the last year.<sup>32</sup>

**But retention remains a problem—nearly two in five officers (39%) who left the service last year had been in the role for less than two years.**<sup>33</sup>

**A fifth of prison officers (21%) have been in post for a year or less.** The proportion of experienced staff is also declining—half of officers (51%) have 10 years of experience or more.<sup>34</sup>

The proportion of staff with two years or less service is rising

Source: HMPPS workforce statistics bulletin: March 2018

## People in prison

### People on remand

**For many people, their first experience of prison is on remand.** This might be ahead of their trial, or whilst they are awaiting sentencing having been found guilty.

**People remanded to custody to await trial are innocent until proven guilty.** 34,017 people were sent to prison before their trial in 2017—down by 16% in two years.<sup>35</sup>

**More than half (56%) of people entering prison on remand awaiting trial are accused of non-violent offences**—16% were for theft offences, and 12% for drug offences.<sup>36</sup>

**People on remand currently make up one in 10 people in prison (11%)**—9,263 people. The majority are awaiting trial (67%), whilst the rest await sentencing.<sup>37</sup>

**One in 10 people remanded into custody by magistrates' courts in 2017 were subsequently acquitted.** A further 14% of people received a non-custodial sentence. In the Crown court, the figures were 12% and 14% respectively.<sup>38</sup>

**Remand prisoners receive no financial help from the prison service at the point of release.** Those acquitted receive no compensation.

**Black men are 26%, and mixed ethnicity men 22% more likely to be remanded in custody at the Crown court than white men.**<sup>39</sup>

**Nearly three in 10 (29%) self-inflicted deaths in 2017 were by people held on remand**—far higher than the proportion of the prison population they represent (11%).<sup>40</sup>

**However, use of remand is falling.** The number of people in prison on remand has dropped by over a quarter since 2010.<sup>41</sup>

<sup>41</sup> Table A2.1i, Ministry of Justice (2018) Offender management statistics: Prison receptions 2017, London: Ministry of Justice and Table A1.1, Ministry of Justice (2018) Offender management statistics: Prison population 2017, London: Ministry of Justice

## Black, Asian and minority ethnic people in prison

### The number of Asian and mixed ethnicity prisoners has risen sharply since 2004

Source: Offender management statistics, Prison population 2017

### BAME men are more likely to be arrested, plead not guilty and be sent to prison by the Crown Court than their white counterparts

Source: Ministry of Justice (2016) Black, Asian and minority ethnic disproportionality in the criminal justice system in England and Wales

Over a quarter (26%) of the prison population, 21,992 people, are from a minority ethnic group.<sup>42</sup>

If our prison population reflected the make-up of England and Wales, we would have over 9,000 fewer people in prison—the equivalent of 12 average-sized prisons.<sup>43</sup>

The economic cost of black, Asian and minority ethnic (BAME) overrepresentation in our prison system is estimated to be £234 million a year.<sup>44</sup>

Research has found a clear direct association between ethnic group and the odds of receiving a custodial sentence. With black people 53%, Asian 55%, and other ethnic groups 81% more likely to be sent to prison for an indictable offence at the Crown court, even when factoring in higher not-guilty plea rates.<sup>45</sup>

The number of Muslim prisoners has more than doubled over the past 15 years. In 2002 there were 5,502 Muslims in prison, by 2017 this had risen to 13,185.<sup>46</sup> They now account for 15% of the prison population but just 5% of the general population.<sup>47</sup>

Muslims in prison are far from being a homogeneous group. Some were born into Muslim families and others have converted. 40% are Asian, 29% are black, 16% are white and 9% are mixed.<sup>48</sup>

Only one per cent of Muslims in prison are currently there for terrorism related offences.<sup>49</sup>

Despite this they make up half of all people held in close supervision centres (CSCs)—25 of 50 people. CSCs are designed to manage highly disruptive and high risk people in prison.<sup>50</sup>

BAME people often report more negatively about their experience in prison. Fewer said they felt safe at the time of the inspectorate's survey; fewer had a member of staff they could turn to for help, fewer said staff treated them with respect, and more said they had been victimised by staff. Responses by Muslim prisoners in these areas were even worse.<sup>51</sup>

Only one in 100 prisoners who made an allegation of discrimination against prison staff had their case upheld by the prison. By contrast, three in four staff (76%) reports of alleged discrimination by a prisoner were upheld.<sup>52</sup>

52 Edgar, K. and Tsintsadze, K. (2017) Tackling discrimination in prisons: still not a fair response, London: Prison Reform Trust

## Older people in prison

**With prison sentences getting longer, more people are growing old behind bars.** People aged 60 and over are the fastest growing age group in the prison estate. There are now more than triple the number there were 15 years ago.<sup>53</sup>

**One in six people (16%) in prison are aged 50 or over—13,559 people.** Of these, 3,278 are in their 60s and a further 1,665 people are 70 or older.<sup>54</sup>

**The number of over 50s in prison is projected to rise to 14,800 by 2021—an increase of 11%.** The most significant change is anticipated in the over 70s, projected to rise by 31%.<sup>55</sup>

**45% of men in prison aged over 50 have been convicted of sex offences.** The next highest offence category is violence against the person (23%) followed by drug offences (9%).<sup>56</sup>

**234 people in prison were aged 80 or over as of 31 December 2016.** 219 were in their 80s, 14 were in their 90s, and 1 was over 100 years old—87% were in prison for sexual offences.<sup>57</sup>

## Life and indeterminate sentences

**Many people in prison don't know if, or when, they might be released.** Indeterminate sentences account for 14% of the sentenced prison population, up from 9% in 1993.<sup>58</sup>

**England and Wales have more than twice as many people serving indeterminate sentences than France, Germany and Italy combined—the highest in Europe by a significant margin.**<sup>59</sup>

**10,018 people are currently in prison serving an indeterminate sentence.** 7,134 people are serving a life sentence and a further 2,884 people are serving sentences of Imprisonment for Public Protection (IPP).<sup>60</sup>

**Despite its abolition in 2012, nearly nine in 10 people (88%) serving an IPP sentence are still in prison having passed their tariff expiry date—the minimum period they must spend in custody and considered necessary to serve as punishment for the offence.**<sup>61</sup>

**459 people are still in prison despite being given a tariff of less than two years—nearly half of these (278 people) have served eight years or more beyond their original tariff.**<sup>62</sup>

**The rate of release for IPP prisoners has increased sharply in the last three years.** In 2017, for every 1,000 people serving an IPP sentence 184 were released.<sup>63</sup>

**But the number of people in prison who have been recalled from the community is rising.** There are currently 847 people serving an IPP who have been returned to custody.<sup>64</sup>

**Lifers continue to serve their sentence on release from prison for the rest of their lives.** They are subject to monitoring and restrictions and can be returned to custody at any point if they break the terms of their licence.

**People serving mandatory life sentences are spending more of their sentence in prison.** On average they spend 17 years in custody, up from 13 years in 2001.<sup>65</sup>

**There are currently 62 people serving a whole life sentence—they are unlikely to ever be released.**<sup>66</sup>

## Life and indeterminate sentences

### The legacy of the IPP

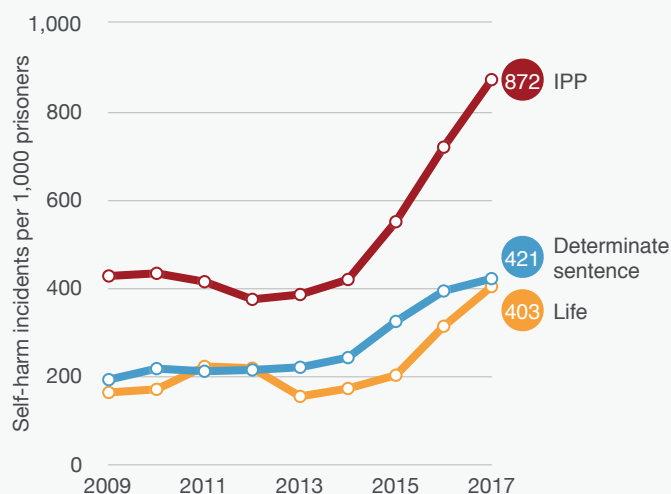

Nearly nine in 10 are stuck in prison beyond tariff

Source: Offender management statistics quarterly: October to December 2017

### Risk of harm?

IPP prisoners are more likely to self-harm

Source: Safety in custody statistics quarterly update to December 2017 and Offender management statistics prison population 2017

### Successful release

Release rates for IPPs have risen sharply in the last three years

Source: Offender management statistics prison releases 2017 and Offender management statistics prison population 2017

### But success is short lived for some

Growing numbers of people on IPPs are back in prison

Source: Offender management statistics quarterly: October to December 2017 and previous editions

### The growth of indeterminate sentences

Use of indeterminate sentences has risen dramatically in the last decade—but is slowly starting to fall

Source: Offender management statistics prison population 2017 and previous editions

## People with learning disabilities and difficulties

**Nearly a third of people assessed in prison in 2016–17 reported that they had a learning disability or difficulty.**<sup>67</sup> This is consistent with previous research.<sup>68</sup>

**7% of people in contact with the criminal justice system have a learning disability**—this compares with only 2% of the general population.<sup>69</sup>

**Inspectors have found that “little thought was given to the need to adapt regimes to meet the needs of prisoners with learning disabilities who may find understanding and following prison routines very difficult.”**<sup>70</sup>

**However, more than half of prisons inspected in 2016–17 were actively identifying and supporting prisoners with learning disabilities**—a marked improvement on previous years.<sup>71</sup>

**Four-fifths of prisoners with learning disabilities or difficulties report having problems reading prison information.** They also had difficulties expressing themselves and understanding certain words.<sup>72</sup>

**Prisoners with learning disabilities or difficulties are more likely than other prisoners to have broken a prison rule; they are five times as likely to have been subject to control and restraint, and around three times as likely to report having spent time in segregation.**<sup>73</sup>

**The government has invested £75m in liaison and diversion services in police custody suites and the criminal courts.**<sup>74</sup>

**There is currently 82% population coverage of liaison and diversion services across England**—full roll out of services should be achieved by 2020–21.<sup>75</sup>

## Foreign nationals in prison

**The term ‘foreign national prisoner’ encompasses many different people.** They may have come to the UK as children with parents, or be second generation immigrants; they may be asylum seekers or been given indefinite leave to remain as a refugee; they could be European nationals; those who have entered the UK illegally or were in the UK as students, visitors or workers who have got involved in the criminal justice system.

**Foreign nationals (non-UK passport holders) currently make up 11% of the prison population in England and Wales.** On 31 March 2018 there were 9,318 foreign nationals in prison.<sup>76</sup>

**Foreign national prisoners come from 162 countries**—but over half are from nine countries (Poland, Albania, Ireland, Romania, Jamaica, Lithuania, Pakistan, Somalia and Portugal).<sup>77</sup>

**More than eight in 10 (81%) foreign nationals entering prison to serve a sentence in 2017 were sent there for non-violent offences.**<sup>78</sup>

**11% of women in prison are foreign nationals.**<sup>79</sup> Some are known to have been coerced or trafficked into offending.<sup>80</sup>

**More than 44,000 foreign national offenders have been removed from the UK since 2010.** 5,865 of these were removed in 2017.<sup>81</sup>

**358 people were still held in prison at the end of March 2018 under immigration powers, despite having completed their custodial sentence.**<sup>82</sup>

## Women in prison

Women make up only

# 5%

of the total prison population

In 2017

# 8,474

women were sent to prison—either on remand or to serve a sentence

Source: Population and capacity briefing for 20 July 2018 and Offender management statistics quarterly: Prison receptions 2017

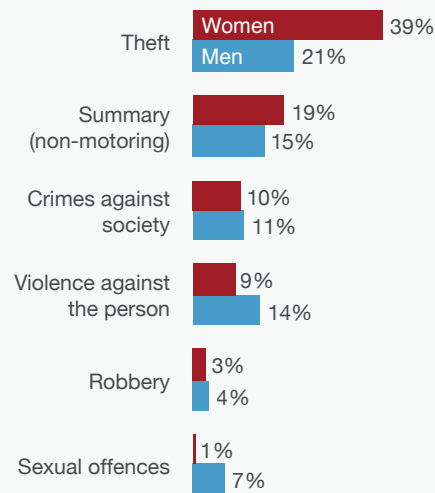

The number of women in prison has more than doubled since 1993. There are now around 2,400 more women in prison today than there were in 1993.

Source: Offender management statistics and Population and capacity briefing for 20 July 2018

**Women tend to commit less serious offences—so many serve prison sentences of 12 months or less.**

In 2017, women and men entered prison for committing the following offences and to serve the following sentences

Source: Offender management statistics, October to December 2017

**Community sentences** for women have halved in a decade—**suspended sentences** have risen, but account for only 3% of all sentences. Use of **short prison sentences** has remained stable

Source: Criminal justice statistics quarterly December 2017, Sentencing data tool

**Many women in prison have high levels of mental health needs and histories of abuse. Rates of self-harm and self-inflicted deaths have been rising**

Source: Safety in custody statistics quarterly update to December 2017

**Many women remanded into custody don't go on to receive a custodial sentence**—in 2016, 60% of women remanded by the magistrates' court and 41% by the Crown court didn't receive a custodial sentence.<sup>83</sup>

**Most women entering prison under sentence (83%) have committed a non-violent offence.**<sup>84</sup>

**More women were sent to prison to serve a sentence for theft than for violence against the person, robbery, sexual offences, fraud, drugs, and motoring offences combined.**<sup>85</sup>

**The proportion of women serving very short prison sentences has risen sharply.** In 1993 only a third of women given a custodial sentence were for less than six months—in 2017 it was nearly double this (62%).<sup>86</sup>

**Eight in 10 women in prison (79%) reported that they had mental health issues compared with more than seven in 10 men (71%).**<sup>87</sup>

**Rates of self-harm amongst women are at the highest level for six years.** Women account for a disproportionate level of self-harm in prison—last year 19% of all self-harm incidents in prison were by women, despite making up only 5% of the total prison population.<sup>88</sup>

**There were 93 pregnant women in prison as of 31 December 2017.**<sup>89</sup>

### Children and young adults in prison

**The number of children (under-18s) in custody in England and Wales has fallen by 70% in the last decade.**<sup>90</sup> They are also committing fewer crimes—with proven offences down by 75% since 2007.<sup>91</sup>

**At the end of May 2018 there were 894 children in custody**—47 children were aged 14 or younger.<sup>92</sup>

**Three in 10 children in custody in 2016–17 were there for non-violent crimes.**<sup>93</sup>

**Fewer than 1% of all children in England are in care,**<sup>94</sup> but they make up around two-fifths of children in secure training centres (38%) and young offender institutions (42%).<sup>95</sup>

**Nearly half of all children in custody (48%) are from a black, Asian or minority ethnic background.** The drop in youth custody has not been as significant for BAME children—a decade ago they accounted for a quarter.<sup>96</sup>

**Only three of the nine children's establishments inspected in 2017–18 were rated as 'reasonably good' for safety and none were rated 'good'**—a sharp decline from 2013–14 when nine out of 12 establishments received these ratings.<sup>97</sup>

**Assault rates amongst children in custody remain high, with an average of 228 assaults a month.** There were 19 assaults per 100 children in custody in the year to March 2017, up from nine in 2010.<sup>98</sup>

**Restraint of children in custody remains high, with an average of 377 restraint incidents a month.** In the year to March 2017, there were 32 incidents of restraint per 100 children in custody, up from 18 in 2010.<sup>99</sup>

**Time spent in education and training in young offender institutions remains limited.** Last year children spent less than 14 hours a week on average in education in publicly run institutions. Those held at the only private institution, Parc, had over 24 hours a week on average in education and vocational training.<sup>100</sup>

<sup>98</sup> Table 8.3, Ministry of Justice (2018) Youth Justice Statistics 2016–17, London: Ministry of Justice and Youth justice statistics 2014 to 2015

<sup>99</sup> Ibid.

<sup>100</sup> House of Commons written question 130254, 7 March 2018

**14,077 young adults (aged 18–24) are currently in prison in England and Wales—they account for 17% of the total prison population.**<sup>101</sup>

**There are now over a third fewer young adults in prison in England and Wales than in 2011.**<sup>102</sup>

**Despite this welcome reduction, the prisons inspectorate has cautioned that those who remain in custody are “some of the most vulnerable, troubled young adults”.**<sup>103</sup>

## Mental health

**26% of women and 16% of men said they had received treatment for a mental health problem in the year before custody.**<sup>104</sup>

**25% of women and 15% of men in prison reported symptoms indicative of psychosis.**<sup>105</sup> The rate among the general public is about 4%.<sup>106</sup>

**Self-inflicted deaths are 5.1 times more likely in prison than in the general population.**<sup>107</sup>

**70% of people who died from self-inflicted means whilst in prison had already been identified with mental health needs.** However, the Prisons and Probation Ombudsman (PPO) found that concerns about mental health problems had only been flagged on entry to the prison for just over half of these people.<sup>108</sup>

**The PPO’s investigation found that nearly one in five of those diagnosed with a mental health problem received no care from a mental health professional in prison.**<sup>109</sup>

**980 people were transferred from prison to a secure hospital in 2016.** Nearly a third of these transfers (32%) took more than 14 days, the Department of Health’s expectation.<sup>110</sup>

**Reoffending rates are lower for people given a community sentence with a mental health treatment requirement.** Rates were 3.5 and 5 percentage points lower respectively for people on a community order or a suspended order, than those without.<sup>111</sup>

**However, less than one per cent of community sentences given in 2016 included a mental health treatment requirement—this has remained unchanged for the last six years.**<sup>112</sup>

<sup>112</sup> House of Commons written question 129485, 5 March 2018

## Rehabilitation and resettlement

### Reoffending

**Prison has a poor record for reducing reoffending—nearly half of adults (48%) are reconvicted within one year of release.** For those serving sentences of less than 12 months this increases to 64%.<sup>113</sup>

**48% of women are reconvicted within one year of leaving prison.** This rises to 61% for sentences of less than 12 months and to 78% for women who have served more than 11 previous custodial sentences.<sup>114</sup>

**Six in 10 children (59%) sent to prison are reconvicted within a year of release—this rises to 68% for those serving sentences of less than six months.**<sup>115</sup>

**Short prison sentences are less effective than community sentences at reducing reoffending.** People serving prison sentences of less than 12 months had a reoffending rate seven percentage points higher than similar offenders serving a community sentence—they also committed more crimes.<sup>116</sup>

**Community sentences are particularly effective for people who have a large number of previous offences.** For those with more than 50 previous offences, the odds of reoffending are more than a third higher (36%) when a short prison sentence is used rather than a community sentence.<sup>117</sup>

### Purposeful activity

Purposeful activity includes education, work and other activities to aid rehabilitation whilst in prison. The government published an education and employment strategy this year, with proposals on increasing the use of release on temporary licence; giving governors powers to commission education in their prisons; expanding vocational training opportunities; and improving employment outcomes on release.<sup>118</sup>

**Just two in five prisons (43%) received a positive rating from inspectors in 2017–18 for purposeful activity work—down from the already low base of half of prisons inspected the year before.**<sup>119</sup>

**An average of 9,400 prisoners are working in the public prison estate, and a further 1,800 are working in private prisons.** They worked for a total of 16 million hours in 2016–17.<sup>120</sup>

**Inspectors found that in too many prisons, work remains mundane, repetitive and is rarely linked to resettlement objectives.** The skills that people had developed whilst in prison often went unrecorded and so failed to help their employment prospects on release.<sup>121</sup>

**People who attend vocational training in prison are more likely to secure employment shortly after release**<sup>122</sup>—a view endorsed by Ofsted.<sup>123</sup>

**Release on temporary licence (ROTL) can play an important part in helping people to prepare for release—particularly those who are serving long sentences.** Following a full risk assessment, it allows people to take responsibility, and reconnect with the world they will be released to.

**There were just 17 failures as a result of alleged further offending out of nearly 333,000 instances of ROTL in 2016.**<sup>124</sup>

**During 2016–17, there were a total of 1,675 people, on average only 368 per month, working out of prison on licence.**<sup>125</sup>

125 Table 5.1 and 5.2, Ministry of Justice (2017) Annual National Offender Management Service digest: 2016 to 2017, London: Ministry of Justice

In

# 99.91%

of cases ROTL is completed successfully.

**People given ROTL within 6 months of release have lower rates of reoffending**

Source: Offender management statistics and Hillier, J., and Mews, A. (2018) The reoffending impact of increased release of prisoners on Temporary Licence

Despite this, restrictions on the use of ROTL have seen its use **drop by a third in the last four years**

**The overall quality of teaching and learning in prisons in England has declined.** Just two-fifths (42%) of prisons were rated as 'good' or better by inspectors in 2017–18, down from half the year before.<sup>126</sup>

**Over half (54%) of people entering prison were assessed as having literacy skills expected of an 11 year old**<sup>127</sup>—over three times higher than in the general adult population (15%).<sup>128</sup>

**Engagement with education can significantly reduce reoffending.** The proven one year re-offending rate is 34% for prisoner learners compared to 43% for people who don't engage in any form of learning activity.<sup>129</sup>

**The Ministry of Justice found that one year reoffending rates were a quarter lower (six to eight percentage points) for people who received support from Prisoners' Education Trust for educational courses or learning materials compared to those in a matched group who did not.**<sup>130</sup>

**Changes to the Offender Learning and Skills Service (OLASS) contract in 2016–17 now allow greater flexibility to fund opportunities, such as arts, and informal learning to allow people to engage and progress during their sentence.**<sup>131</sup>

**However, there have been declines in the number of people participating in learning whilst in prison, and in achieving qualifications in recent years.**<sup>132</sup>

**88,900 adults in the prison system participated in education in the 2016–17 academic year—a drop of six per cent in the last year.**<sup>133</sup>

**There have been similar declines in the number of people achieving qualifications overall and Level 2 (GCSE equivalent) qualifications—falling 5% and 7% respectively.**<sup>134</sup>

**The number of English and maths qualifications achieved at level 1 or 2 (GCSE equivalent) has plummeted—numbers fell by 46% in English and 43% in maths between the 2011–12 and 2016–17 academic years.**<sup>135</sup>

**Just 100 people achieved a level 3 qualification (AS and A Level equivalent) in the 2016–17 academic year via mainstream prison learning—less than a tenth of the number in 2011–12.**<sup>136</sup>

## Resettlement

**Nearly everyone in prison will be released at some point.** 71,495 people were released in 2017.<sup>137</sup>

For many, having a criminal conviction is a barrier to leading a law-abiding life on release. The Rehabilitation of Offenders Act 1974 gives people with spent convictions and cautions the legal right not to disclose them when applying for most jobs.

**Only one in four people (27%) people released from prison in 2014–15 had a job to go to.**<sup>138</sup>

**Half of respondents to a 2016 YouGov survey said that they would not consider employing an offender or ex-offender.**<sup>139</sup>

**Just one in five people (22%) leaving prison and referred to the Work Programme have found a job which they have held for six months or more.**<sup>140</sup> Of these, two in five (41%) have subsequently gone back to Jobcentre Plus.<sup>141</sup>

**However, more than 90 employers so far, including the entire Civil Service, have signed up to Ban the Box**—removing the need to disclose convictions at the initial job application stage as a first step towards creating fairer employment opportunities for ex-offenders.<sup>142</sup>

Entitlement to housing benefit stops for all sentenced prisoners expected to be in prison for more than 13 weeks. This means that many prisoners have very little chance of keeping their tenancy open until the end of their sentence and lose their housing.

**One in 10 people (11%) released from custody in 2014–15 had no settled accommodation.**<sup>143</sup>

Inspectors have said that the figures are “misleading” as “they do not take into account the suitability or sustainability of the accommodation.”<sup>144</sup>

**The Homelessness Reduction Act 2017 means that prisons and probation providers will be subject to a new duty to refer people who might be at risk of becoming homeless to the local housing authority.**<sup>145</sup>

**Many people in prison are released with debts which have built up during their sentence—adding to the problems they face on release.** These include outstanding fines, rent or mobile phone contracts. Inspectors found that in many cases no action was taken before release, despite problems being apparent at the start of a sentence.<sup>146</sup>

**More than four in five former prisoners surveyed said their conviction made it harder to get insurance and four-fifths said that when they did get insurance, they were charged more.** The inability to obtain insurance can prevent access to many forms of employment or self-employment.<sup>147</sup>
